Sapyyn Repository Link Corrections

Current Issues and Recommended Fixes

1. Asset Links (All Files)

Current:

- `/logo.svg`
- `/favicon.ico`
- `/hero-dashboard.png`

Should be:

- `./assets/logo.svg` or `./images/logo.svg`
- `./assets/favicon.ico`
- `./assets/hero-dashboard.png` or `./images/hero-dashboard.png`

2. Portal Navigation (sapyyn-portal.html)

Current:

```html
<a href="/portal" class="portal-logo">
<a href="/portal/dashboard" class="active">Dashboard</a>
<a href="/portal/referrals">My Referrals</a>
<a href="/portal/appointments">Appointments</a>
<a href="/portal/documents">Documents</a>
<a href="/portal/messages">Messages</a>
```

Should be:

```html
```

```html
<a href="./sapyyn-portal.html" class="portal-logo">
<a href="./sapyyn-portal.html" class="active">Dashboard</a>
<a href="./portal-referrals.html">My Referrals</a>
<a href="./portal-appointments.html">Appointments</a>
<a href="./portal-documents.html">Documents</a>
<a href="./portal-messages.html">Messages</a>
```

3. Quick Action Links (sapyyn-portal.html)

Current:

html

```html
<a href="/portal/new-referral" class="action-card">
<a href="/portal/find-provider" class="action-card">
<a href="/portal/upload-document" class="action-card">
<a href="/portal/schedule" class="action-card">
```

Should be:

html

```html
<a href="./portal-new-referral.html" class="action-card">
<a href="./portal-find-provider.html" class="action-card">
<a href="./portal-upload-document.html" class="action-card">
<a href="./portal-schedule.html" class="action-card">
```

4. Main Site Navigation (sapyyn-main-site.html)

Current:

html

```html
<a href="/portal" class="btn btn-secondary">Sign In</a>
<a href="/portal/signup" class="btn btn-primary">Get Started</a>
<a href="/portal/signup" class="btn btn-primary">
```

Should be:

html
```

```html
<a href="./sapyyn-portal.html" class="btn btn-secondary">Sign In</a>
<a href="./portal-signup.html" class="btn btn-primary">Get Started</a>
<a href="./portal-signup.html" class="btn btn-primary">
```

5. Legal and Info Pages (sapyyn-main-site.html)

Current:

```html
<a href="/privacy">Privacy Policy</a>
<a href="/terms">Terms of Service</a>
<a href="/hipaa">HIPAA Compliance</a>
<a href="/security">Security</a>
<a href="/contact">Contact</a>
```

Should be:

```html
<a href="./privacy.html">Privacy Policy</a>
<a href="./terms.html">Terms of Service</a>
<a href="./hipaa.html">HIPAA Compliance</a>
<a href="./security.html">Security</a>
<a href="./contact.html">Contact</a>
```

Recommended Repository Structure

```
sapyyn/
    ├────── index.html (rename sapyyn-main-site.html)
    ├────── sapyyn-portal.html
    ├────── sapyyn-admin-panel.html
    ├────── portal-referrals.html (new)
    ├────── portal-appointments.html (new)
    ├────── portal-documents.html (new)
    ├────── portal-messages.html (new)
    ├────── portal-new-referral.html (new)
    ├────── portal-find-provider.html (new)
    ├────── portal-upload-document.html (new)
    ├────── portal-schedule.html (new)
    ├────── portal-signup.html (new)
    ├────── privacy.html (new)
    ├────── terms.html (new)
    ├────── hipaa.html (new)
    ├────── security.html (new)
    ├────── contact.html (new)
    ├────── assets/
    │    ├────── logo.svg
    │    ├────── favicon.ico
    │    └────── hero-dashboard.png
    ├────── css/
    │    └────── styles.css (optional - extract common styles)
    ├────── js/
    │    └────── scripts.js (optional - extract common scripts)
    └────── README.md
```

GitHub Pages Configuration

If hosting on GitHub Pages, ensure:

1. **Main site** should be named `index.html`

2. **Base URL** in repository settings points to your GitHub Pages URL

3. **Relative paths** work correctly with the repository structure

Additional Recommendations

For GitHub Repository:

1. **Create missing pages** referenced in the navigation

2. **Add proper meta tags** for GitHub Pages SEO

3. **Include README.md** with setup instructions

4. **Add LICENSE file** if open source

5. **Create .gitignore** for any build files

For Production Deployment:

1. **Use environment variables** for base URLs

2. **Implement proper routing** if using a single-page application framework

3. **Add SSL certificates** for security

4. **Set up domain redirects** if using custom domain

Files That Need Updates

1. **sapyyn-portal.html** – Update all internal navigation links

2. **sapyyn-main-site.html** – Update portal links and legal page links

3. **sapyyn-admin-panel.html** – Update asset paths

4. **Create missing pages** – All the referenced but non-existent pages

5. **Add assets folder** – Move logo, favicon, and images to proper directory
